Document Revision 1.2

June 19, 2006

1   Requirements

The WARPdoc document class requires:

1. **WARP logo**: The WARP project logo in PDF form must be in the root directory of your LaTeX project and must be named "warplogo.pdf". A copy of the logo is included with this example document.

2. **hyperref package**: The hyperref package must be in the path of your LaTeX installation. You can obtain a copy of the package from http://www.tug.org/applications/hyperref/.

3. **color & graphicx packages**: These packages are required for the color formatting and graphics included in the WARPdoc class. These are standard packages which are probably included in your LaTeX installation.

2   Sections

This document class supports hierarchy through sub-subsections, as illustrated below.

2.1   Subsections

This is the body of the first subsection.

2.1.1   Sub-subsections

This is the body of the first subsubsection.

3   Figures

Figures are included in the usual way. Here's a reference to the figure below: Figure 1.
